

Novade Maintenance

Enterprise App to Manage Schedule Maintenance & Repair Work

Plan, Inspect, Repair, Report.

Novade Maintenance is a collaborative system:

- **Technicians** can access and input data on assets during inspections.
- **Managers** can plan, monitor and validate inspections.
- **Customers** can request repair jobs and access reports.

Create, Customize & Manage Your Database

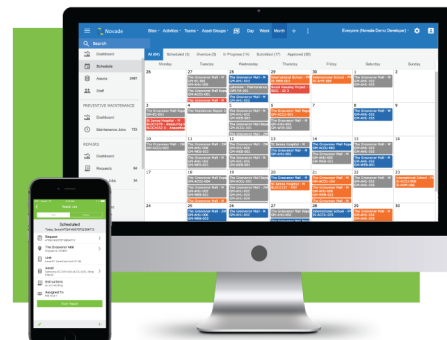

- **Import data** from Excel or use our web services and APIs to exchange data with your existing enterprise solution.
- **Create custom checklists** for each type of asset with customisable approval workflows.
- **Locate & access** asset data with GPS tagging, Barcode Scanning, or NFC Tags.
- **Manage** maintenance contracts and spare parts.

Manage Preventive Maintenance

- **Schedule** inspections online.
- **Notify** technicians in real time.
- **Complete and submit** maintenance checklists.
- **Approve** and archive reports.
- **Access** data analytics in real time on all your assets.

Requests & Repair

- **Collect requests** from users with a mobile application.
- **Assign repair jobs** to technicians in real time.
- **Approve & archive** repair jobs.
- **Check time spent** on each job.
- **Monitor** Assets' service level agreements.
- **Conduct data analytics** on all your assets.

Improve Productivity

Effective planning, efficient processes, no more time wasted in reporting.

Increase Asset Lifecycles

Make the right decisions with real-time access to asset info & powerful analytics.

Boost Customer Satisfaction

With a solution that facilitates communication with clients.
