

CMiC ENTERPRISE: CONSTRUCTION ERP FOR GROWTH

As they take on a growing number of projects—and try to keep them running on budget and on schedule—construction and capital projects firms depend on much greater cost and pricing transparency. CMiC Enterprise **delivers total visibility of real time data in complex environments with shifting cost structures**—a single and persistent version of truth, from the back office to field operations.

Built on a single database platform, CMiC Enterprise includes a complete set of unified capabilities: **financial controls** to enforce rules and achieve compliance with fiscal best practices and project specifications; **human capital management** to realize the potential of your staff; **asset management** to deliver visibility into asset cost-to-performance ratios; **corporate risk management** to ensure regulatory compliance; **project controls & delivery** to maximize the profitability of every job; **enterprise planning** to optimize resources, opportunities and schedules; and **ECM** to take control of your workflows, content assets and analytics.

To match a broad spectrum of IT infrastructures, rollout timeframes and budgets, CMiC Enterprise can be deployed as an on-premise platform, as a service (PaaS) or as part of a multi-tenanted Cloud environment.

A SINGLE SOURCE OF TRUTH

It is essential for construction firms to unify functional silos and manage their total business, from accounting and budgeting to project delivery and resource management.

A truly strategic enterprise solution won't just enable your employees to work efficiently in the back office and in the field. It will also **set the stage for future growth and expansion**—at little to no added overhead cost—by leveraging the same platform for financial controls, resource & asset management and project delivery.

The benefits of an enterprise-level, **single database platform** extend beyond data conflicts. A system that captures and organizes data from every department in the same way allows your leadership team to draw richer insights from all data—in real time.

When your team can successfully complete critical business functions as the number of projects expands, your organization can **grow without the traditional burdens of scale**. Having more data doesn't slow down your ability to analyze it; it only makes your data more robust and your analyses more insightful.

Ask an expert and determine your solution today!

CMiC delivers the most comprehensive and advanced enterprise and field operations solutions for construction and capital projects companies. CMiC's powerful software transforms how firms optimize productivity, minimize risk and drive growth by planning and managing all financials, projects, resources, and content assets—all from a single database platform.
