Powerproject: The power behind successful projects

Introducing Powerproject

First launched in 1988, Powerproject is a powerful, project, portfolio and resource management solution designed to support the way construction planners work and has evolved with their input so that it specifically meets the needs of the industry. Used by large and small businesses alike, it is the preferred software of thousands of construction professionals.

Powerproject has been used on some of the world's most complex construction projects including: Europe's tallest building, The Shard; The Reichstag in Berlin; Banora Point Highway in Australia; Durban International Airport and the rebuilding of Christchurch New Zealand.

"Powerproject is a lot simpler to read than Primavera and others. I like it because of how you can drop the progress lines down, put resource schedules together, and run bars alongside each other in order to do comparisons. It has lots of uses."
Domonic Egan, Operations Director, McLaren Construction

Why choose Powerproject?

- **Easy-to-use** but extremely powerful
- **Fully scalable** so suits projects and portfolios of all sizes
- **Superior presentation** of project plans and simpler printing
- Filtering for **easier management** of sub-contractors
- **Better protection against litigation caused by delay**
- **Cost-effective** licensing options: choose single user, concurrent user or SaaS licence – see page 3
- **Enterprise option** for multi-user, multi-project, real-time access – see page 3
- **Affordable 4D planning** – link project plans to 3D models within a single application – see page 4
- **Site Progress Mobile** – update project information with remotely recorded progress – see page 5
- **Provides dashboard reporting** for quick executive summaries of progress – see page 6
- **Easily integrates** with other software – see page 6
- **Construction-specific** training courses and expert support – see page 7

Cost-effective, flexible licensing and deployment options

Choose the best option for your business from three licence types.

Single User:

Simplest licence, where the software can be accessed on one specific machine only.

Concurrent User:

A cost-effective way of letting more users have access to the software by sharing licences and bringing down the overall cost of purchase considerably.

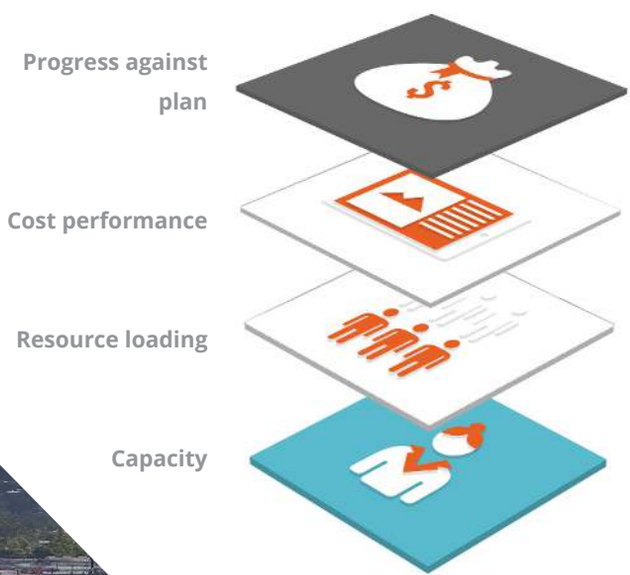
SaaS Licence (Cloud):

As an alternative option to outright purchase, a licence can be taken on subscription (min term 6 months). This allows an individual user to access the software via a Cloud service.

Share plans with anyone with a FREE PROJECT VIEWER

"Powerproject's shared licensing model makes it much more economical than other software such as MS Project for which you need to buy a full licence for every user."

Clive Bassett, Financial Director, Beard



Visibility of Project Health

Powerproject Enterprise

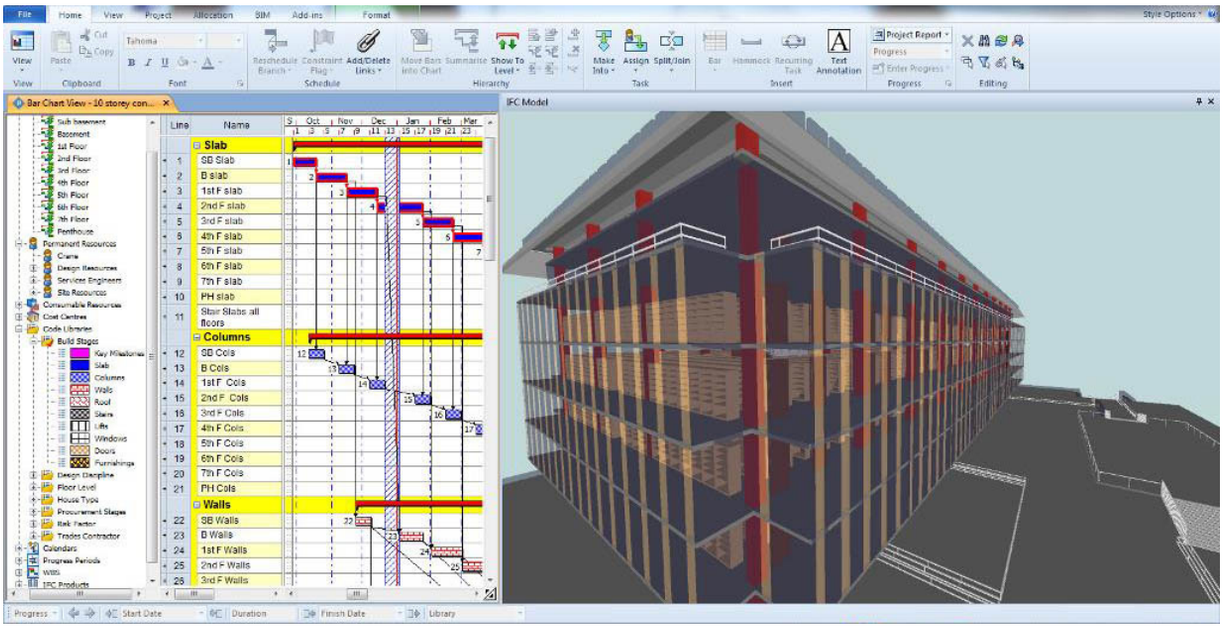
Powerproject Enterprise is ideal where a number of people need to access and update a central plan. It gives organisation-wide visibility over all project-related data so that multiple users can work collaboratively viewing real-time information.

Both single and concurrent user options are available with enterprise access.

With Powerproject Enterprise you can:

- Centrally manage all your projects for optimum efficiency
- Enable a number of people to access and work on the same project plan at the same time
- Collect data from multiple sites quickly and easily and input it directly into the project plan
- Control project costs, income and cash flow across your portfolio

Talk to us about the best option for your team.

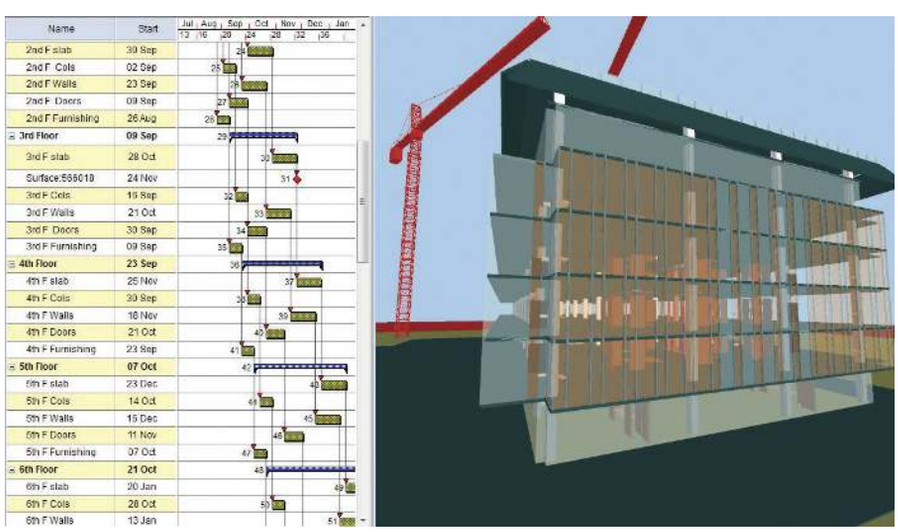


Powerproject BIM

Powerproject BIM is an integrated module for Powerproject which enables you to easily link the tasks in your project plan with 3D model components for 4D planning in one application. It is ideal for tendering and progress monitoring.

- Identify problems that may not be visible via traditional schedules
- Run scenarios to assess feasibility of execution and find the best solutions
- See the impact in the 3D view as you update the Gantt chart
- Study how the build process will appear at different project stages
- Integrate as-built information
- Create better tenders, faster

"Powerproject BIM gives us a high-level overview of the project."
Ibrahim Patel, Planner, Galliford Try



Site Progress Mobile

Site Progress Mobile is a free, downloadable app for Android, Apple (iOS) or Windows Phone which enables mobile users to record the progress of tasks and repetitive events from a remote location against their work as scheduled in an Powerproject project plan. It can also be accessed via the web.

Each user sees only the relevant tasks and progress check lists for which they have responsibility. The app is free to install, with the use of the service charged` according to the number of active jobs exported to the secure cloud storage area.

Site Progress Mobile enables you to:

- Record project progress quickly and easily via mobile devices
- Update progress at any time, from any location. No signal needed to record progress values, only when submitting updates
- Improve data accuracy by removing need for any re-keying of progress updates from paper notes or emails

- Record actual dates for events not just the percentage complete
- Take photographs and record notes which can be associated with particular tasks or build stages

"With Site Progress Mobile it took us between a third, to a half, of the original time."
Peter Farmer, Senior Planning Manager, Interserve

Dashboard reporting

Business Intelligence is a powerful analytical tool which enables you to easily produce accurate, professional looking dashboard reports on the core business metrics required by the senior managers within your organisation without having to collate the data manually. With Business Intelligence you can:

- Receive early warning of any delays or issues in meeting deadlines
- See complete visibility over the status of all your projects, resources and costs
- Combine Powerproject generated data with third party data sources

Easy integration with other software

Powerproject enables you to open files from and integrate with other systems to support collaborative working and help you exchange project data easily with people working on different software if needed.

- Open files from Microsoft Project, Oracle Primavera and SureTrak
- Save Powerproject files into formats that can be opened in such systems
- Templates are provided for opening files from other formats for familiar presentation
- Easy integration with systems such as estimating applications (including our Bidcon product), enterprise resource planning (ERP) systems and BIM tools

"Powerproject is the programme planning brand everyone is familiar with'."
Gerry Lavelle
Senior Project Planner
Osborne

Getting you started

With over 25 years of experience of providing our project, portfolio and resource management solutions to the construction and engineering industries, we understand the best ways for you to maximise the benefits and return from your investment in Powerproject through:

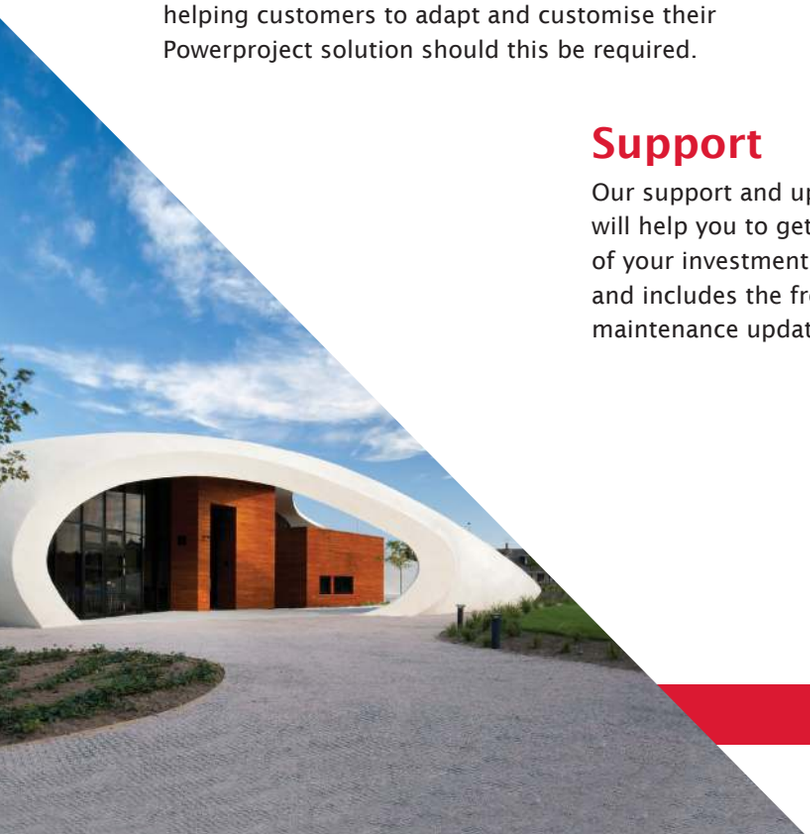
Training

We provide a wide range of training to help both new and more experienced users to improve their skills in working with Powerproject.

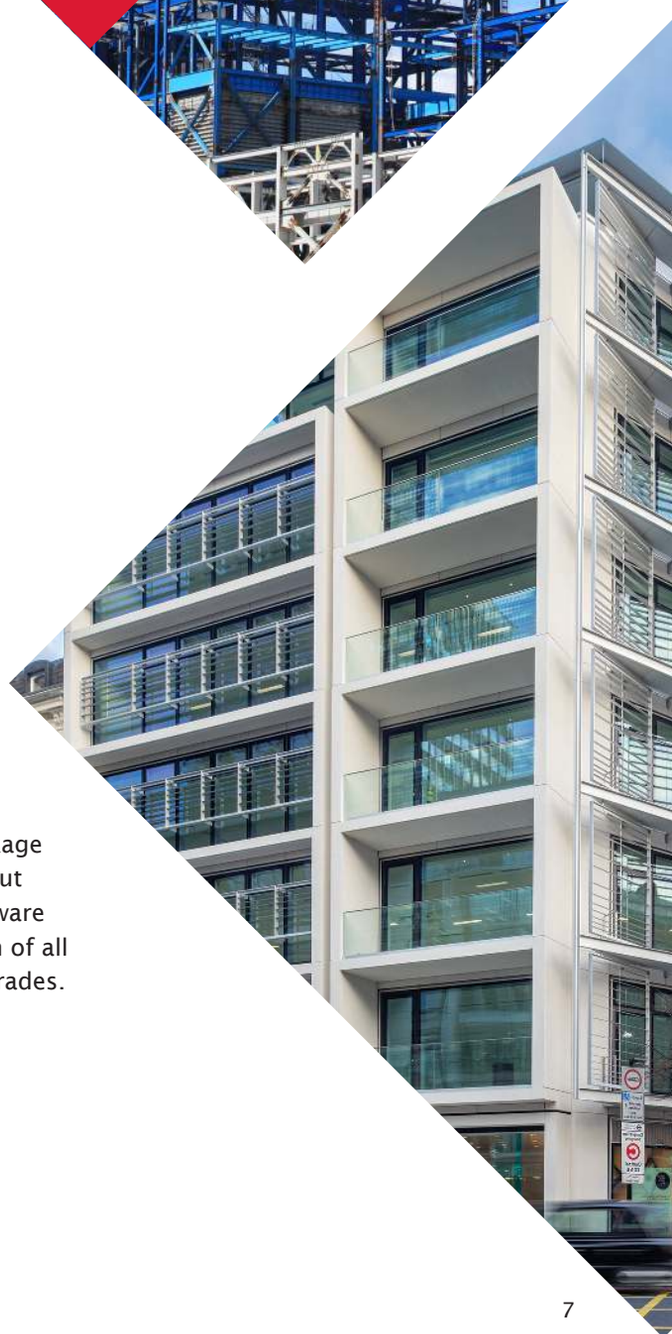
Courses are held at our Training Centre in Haddenham, Buckinghamshire; at regional locations throughout the UK; or can be held at your own premises. We can tailor courses to your company requirements and provide web-based training sessions.

Consultancy and Implementation

Our in-house team of dedicated project management software professionals has wide experience of helping customers to adapt and customise their Powerproject solution should this be required.



"One big advantage with Powerproject is the helpdesk. I know that if I ever get stuck I can just phone them, and they'll help me out."
Graham Roebuck, Chief Planner, Skanska



Support

Our support and upgrade package will help you to get the most out of your investment in our software and includes the free provision of all maintenance updates and upgrades.
